Fund Objective

The investment objective of the fund is to maximise the current income consistent with the preservation of principal and liquidity by investing in a diversified portfolio of high quality Euro denominated short term debt and debt related instruments. The primary objective is to maintain the net asset value either constant at par (net of earnings) or at the value of the investors' initial capital plus earnings.

Investment Manager's Report

Having been somewhat late to arrive at the party, the ECB and other European authorities are taking the lead from the US and UK in providing additional funding to their diverse, beleaguered economies and to continue to slowly reduce interest rates. Despite this interbank lending remains at severely reduced levels. However the build up of short term cash deposits in the coffers of the banks considered most credit-worthy or essential to the world's payments system, has seen a continued reduction in period LIBOR rates. This is due to the fact that cash rich banks are able to engage in longer term lending by using their 'cash bank', for which they are paying negligible rates to their clients.

On the other hand, those banks which are unable to access sufficient short dated deposits from their client base, are attempting to reduce their cash shortfalls by bidding for period deposits. This has meant that 'LIBOR' can be significantly different, perhaps by as much as 80 basis points, for banks which before the credit crunch would have been competing for deposits in liquid interbank market at rates which were normally within 5 basis points of one another.

While this situation continues, and there is little evidence to suggest that it will soon be over, lower official LIBOR rates are possible, although the rates at which individual banks can attract funds will continue to diverge.

Your fund continues to concentrate on the credit quality and liquidity of the portfolio, while seeking to maximise returns by benefiting from the positive yield curve to invest in top quality names for up to 3 months.

Prime Rate Capital Management LLP

Prime Rate Capital Management LLP was formed as the first independent, specialist provider of AAA-rated liquidity funds, known as Qualifying Money Market Funds, serving the corporate and institutional market.

Prime Rate offers independent, specialist liquidity fund products on a wholesale, competitive basis for a variety of corporate and institutional investors, to distribute to their client base, often under a "white-labelling" arrangement, or to use in the management of their own liquidity.
