

PRIME RATE EURO LIQUIDITY FUND

FOR PROFESSIONAL INVESTORS ONLY

MONTHLY UPDATE DECEMBER 2011

Standard & Poors AAAm rated

Fitch AAAmf rated

FUND OBJECTIVE

The investment objective of the Fund is to maximise the current income consistent with the preservation of principal and liquidity by investing in a diversified portfolio of high quality Euro denominated short term debt and debt related instruments. The primary objective is to maintain the net asset value either constant at par (net of earnings) or at the value of the investors' initial capital plus earnings.

INVESTMENT MANAGER'S REPORT

As December drew to a close one of the big fears was the Eurozone slipping back into recession. Despite efforts from the European Central Bank ("ECB") to ensure liquidity and some sort of stability we have not seen any definitive solution put on the table and, as such, still see wariness over the debt difficulties, rising unemployment and a weakening Euro all weighing on market sentiment. Data released for November showed unemployment had hit a record high of 10.3% for the 17 Euro countries. Whilst unemployment in Germany continues to decrease, the debt laden countries continue to suffer from the downward pressure, signifying the growing divergence between the Eurozone "core" and the "peripheral" nations.

With consumer spending being seen as one of the key drivers to growth, the seventh consecutive fall in the European Commission Business and Consumer Survey (reaching 92.0, the lowest level since November 2009) and the forecast of further job losses in 2012, does not indicate this will boost the recovery. Elsewhere, banks continue to strongly utilise ECB lending facilities. If, as hoped, the €489bn is used to buy Eurozone government bonds we could well see a welcome respite as the majority of a €700bn wall of debt needs to be refinanced in the first quarter of 2012.

With ECB funding to banks remaining elevated, Libor rates continued their decline in December with overnight rates dropping from 0.704% p.a. to 0.507% and 3 month Libor falling from 1.432% to 1.357%. Despite these declines and ongoing sensitivity in the market, the Fund continues to invest in reasonably priced, strongly rated assets whilst maintaining a sufficient level of liquidity. With many European organisation ratings under pressure it is, however, more challenging to obtain sufficiently highly rated term assets. As such, we have reduced the Fund's WAM to 21 days to ensure we are suitably placed to react to any changes in the market.

PRIME RATE CAPITAL MANAGEMENT LLP

Prime Rate Capital Management LLP is the first independent, specialist provider of AAA-rated liquidity funds, known as Qualifying Money Market Funds, serving the corporate and institutional market. Prime Rate offers independent, specialist liquidity fund products on a wholesale, competitive basis for a variety of corporate and institutional investors, to distribute to their client base, often under a 'whitelabelling' arrangement, or to use in the management of their own liquidity. Federated Investors, Inc agreed to purchase Prime Rate in December 2011.
